

One **Family.** One **Lock.**

Digital Door Locks
Making Access Smart & Secure.

Introducing Digital Door Locks

When entering or leaving a building, a home or even just a room, people often use dormakaba products and solutions to do so. From door solutions to master key systems, from customized access systems to flexible room solutions.

Changes in the way we live, we work and build go hand in hand with an increased need for security. From homes to high-end facilities that house high security people and equipment, need the protection it deserves. A protection they can trust.

That's where our Digital Door Locks fit right in.

One **Family**. One **Lock**.
Many Access codes.

Safe | Secure | Smart | Stylish | Simple

Push or Pull. It doesn't matter

Some doors open inward. Others outward. With our Push and Pull the door can be opened both ways.

No more keys

Keys are so yesterday. Modern homes need modern security to keep up with the times. Our Digital Door Locks come with PIN codes / Fingerprint / RFID Cards / Mobile App to open the lock. Not for one, but for everyone in the family.

Safe, secure & very modern

Digital Door Locks from dormakaba are made using the same technology that is used in critical & safe installations worldwide. Governments, Hospitals, Airports, Factories trust dormakaba to keep their assets safe & secure.

Shake your phone to open door

Our Digital Door Locks come with advanced technology features. It just needs to read the Bluetooth authentication from your phone. You can also send a limited time expiry PIN code to someone you trust. The PIN code will expire after the expiry time you set.

Push & Pull Digital Door Lock DP850

Handle reads your fingerprint.
Opens seamlessly.

DP850 lock is a newly designed premium push and pull intelligent door lock. This lock is equipped with convenient push & pull handle and high secure automatic motorized mortise. The push & pull handle offers brand new experience with no fixed direction to open the lock. It has fingerprint sensor on push and pull handle offering single hand opening experience. The lock has Bluetooth Low Energy (BLE) feature allowing user to open the door using their mobile app & share valid password to other users.

Protecting People, Properties & Possessions. For over 150 years.

Making Access Smart & Secure.

About dormakaba

dormakaba is a global corporation with operations in over 130 countries. dormakaba known for several firsts in the industry, has over 2000+ patents, testimony to our innovation and cutting-edge technology.

dormakaba has installed high-secure access solutions and door closers in some of the most critical secure facilities, protecting possessions that protect the world.

The Swiss Connection

Switzerland brings to our mind precision watches, perfumes and even chocolates. For the peripatetic, it could also bring fond memories the Alps and the Skis.

One of the other well-known but under stated things that makes Swiss tick is Protecting the Precious Possessions & Properties, through its well-heeled banking system. It is considered as one of the most sophisticated and impenetrable fortresses ever built.

dormakaba, headquartered in Zurich brings the same sophistication and impenetrable security system to its access solutions.

No wonder, dormakaba is the most trusted brand in the world when it comes to access solutions.

At dormakaba, Innovation = expertise + the courage to break new ground

Innovative thinking has been at the heart of our company for more than 150 years. The clearest evidence is our range of smart access and security solutions, which are the foundation of our business. We aim to be leading innovators in our sector.

The merger that created dormakaba has enabled us to provide our customers with a broad and innovative range of products from a single source. To ensure that our customers are always ahead of the competition, we constantly question

and review our business, our products, and our processes: What are the current market and technology trends, how are customer requirements changing, and what does digital transformation mean not only for our sector, but more importantly for our company and our employees?

Innovation however is a term we do not apply until we are creating added value – for our customers, our business, or our employees.
